

U301 USB Device Sprint 3G/4G Mobile Broadband

The U301 delivers the best of both worlds: Turbo-charged Sprint 4G* Network and nationwide 3G coverage everywhere else. Plug the U301 into your port and you can download mammoth files or video conference without the lag. With access to ultra-fast speeds, easy setup, and compatibility with Windows® and Mac operating systems, it's the perfect portable solution for both business and personal use.

Quick and easy installation, plus Windows and Mac compatibility
Improved signal strength and convenient rotating USB connector
GPS Navigation enabled

Device Cost: Free with new service activation
Monthly Service: \$39.99 unlimited use (3G); \$59.99 (3G/4G)

Overdrive™ 3G/4G Mobile Hotspot by Sierra Wireless ***3G/4G Shareable Mobile Hotspot Exclusively from Sprint***

Accelerate at high speed with the first dual-mode shareable device of its kind- available only from Sprint. Now you can extend your 3G and 4G* experience beyond your laptop to any Wi-Fi-enabled device such as cameras, music players and portable game consoles. And because it supports up to five Wi-Fi-enabled devices, you can share your high-speed connection with friends, family, co-workers and customers. 16 GB of shared storage and no software or activation to fuss with, the Overdrive is a must have for work or play, home or away. Unique LCD screen displays signal strength, battery level and network connection type.

GPS Navigation enabled
Memory card slot
Improves in-building wireless signal
Supports multiple simultaneous users

Device Cost: \$99.99 less \$25.00 sales credit, plus sales tax
Monthly Service: \$39.99 unlimited use (3G); \$59.99 (3G/4G)

*4G available in select cities now; planned for Southern CA later this year)
4G speeds that are up to 10x faster than 3G*
